

Solution development plan

Program id: <id>
Program name: <name>
Program manager: <name>

Project id: <id>
Project name: <name>
Project manager: <name>

Date: <date>
Version number: <version>
Status: <draft / final>

Note: All sections in this template require completion. Ensure the detail is appropriate and refer to or attach additional documentation if required. If a section is not relevant to your program/project, leave the section in, state 'n/a' and explain the reasons. (Optional: Delete this text box once the template is completed).

Use the footer field to track document version numbers.

Table of contents

1. Document overview	3
1.1 Definitions	3
1.2 Referenced documents	3
2. Solution development approach & scope	4
2.1 Approach	4
2.2 In scope	4
2.3 Out of scope	4
3. Activities, deliverables & schedule	5
3.1 Activities & deliverables	5
3.2 Solution development schedule	5
4. Resourcing approach & requirements	6
4.1 Solution development team structure	6
4.2 Roles & responsibilities	6
4.3 Resource requirements	7
4.4 Facilities & infrastructure requirements	7
4.5 Environment & tool requirements	8
4.6 Environment management processes	8
5. Assumptions, constraints & dependencies	9
5.1 Assumptions	9
5.2 Constraints	9
5.3 Dependencies	9
6. Risks & issues	10
6.1 Key risks	10
6.2 Key issues	10
7. Document control	11
8. Appendix A – Solution development schedule	12

Using this template

If you are using a solution development methodology (for example Six Sigma) in parallel with Projects in the Customer, you may use the template from your solution development methodology instead of this template.

If your project comprises multiple streams / sub-projects, each using a different solution development methodology, you may use this template to summarize / consolidate the information from the various streams / sub-projects.

<text here>

1.1 Definitions

Include the definitions of any terms used in this document that are specific to the program/project and those where there may be ambiguity. Do not include terms in the public domain or those in wide use in the Group.

Term	Definition

1.2 Referenced documents

Provide a list of key documents referenced in this document or used to provide input into this document. Identify each document by title, version and date. Explain succinctly why the document is referenced (e.g. for program/project context). Specify the source (team/person) and document location (preferably soft copy).

The following key documents are referenced in this document:

Document	Version	Why referenced	Source / location
Business case			
Detailed requirements			
Future operational environment			
Environment gap analysis			
Solution development strategy
