

Implementation plan

Program id: <id>

Program name: <name>

Program manager: <name>

Project id: <id>

Project name: <name>

Project manager: <name>

Date: <date>

Version number: <version>

Status: <draft / final>

Note: All sections in this template require completion. Ensure the detail is appropriate and refer to or attach additional documentation if required. If a section is not relevant to your program/project, leave the section in, state 'n/a' and explain the reasons. (Optional: Delete this text box once the template is completed).

Use the footer field to track document version numbers.

Table of contents

1. Document overview	3
1.1 Definitions	3
1.2 Referenced documents	3
2. Implementation approach and scope	4
2.1 Implementation approach	4
2.2 In scope	4
2.3 Out of scope	4
3. Implementation framework	5
3.1 Organizational change management	5
3.2 Support	5
3.3 Communications	5
3.4 Training	5
3.5 Contingency / back-out plan	5
4. Activities, deliverables & schedule	6
4.1 Implementation activities & deliverables	6
4.2 Implementation schedule	6
5. Implementation structure & requirements	7
5.1 Implementation team structure	7
5.2 Resources & responsibilities	7
5.3 Facilities & infrastructure requirements	7
6. Go live planning	8
6.1 Go / no go criteria	8
6.2 Monitoring and reporting	9
6.3 Go live decision	9
7. Handover to BAU	10
7.1 Solution owner	10
7.2 Handover criteria	10
7.3 Handover plan	10
8. Assumptions, constraints & dependencies	11
8.1 Assumptions	11
8.2 Constraints	11
8.3 Dependencies	11
9. Risks & issues	12
9.1 Key risks	12
9.2 Key issues	12
10. Document control	13
Appendix A – Implementation schedule	14
Appendix B – Contact list	15

1. Document overview

Using this template

If you are using a solution development methodology (for example, Six Sigma)

If your project comprises multiple streams / sub-projects, each using a different solution development methodology, you may use this template to summarize / consolidate the information from the various streams / sub-projects.

The purpose of this document is to provide a detailed plan for the implementation of the solution. The Implementation plan excludes the Solution development and Test plans.

1.1 Definitions

Include the definitions of any terms used in this document that are specific to the program/project and those where there may be ambiguity. Do not include terms in the public domain or those in wide use in the Group.

Term	Definition

1.2 Referenced documents

Provide a list of key documents referenced in this document or used to provide input into this document. Identify each document by title, version and date. Explain succinctly why the document is referenced (e.g. for program/project context). Specify the source (team/person) and document location (preferably soft copy).

The following key documents are referenced in this document:

Document	Version	Why referenced	Source / location
